SUMMARY

Skilled developer proficient in programming languages and technologies such as JavaScript, React, Python, and SQL. Experienced in both front-end and back-end development, with a track record of delivering solutions that meet specified objectives.
Passionate about continuous learning, staying up-to-date with modern tools and frameworks to solve complex problems and build user-centric web applications.

EXPERIENCE

Software Developer

Oct '23 — Present

UBA Plc

Lagos

As a Backend Developer at UBA, I integrate third-party APIs into the bank's VAS system, directly contributing to revenue growth. I also build scalable backend services that serve internal and third party applications.

- Developed an automated settlement system with encrypted communication to third-party endpoints using Python, Postgres, Celery, and encryption algorithms, eliminating manual intervention and reducing processing time by 35%.
- Developed a VAT and commission collection system for customer transactions on behalf of a third-party partner, generating revenue for the bank.
- Enhanced the global staff appraisal portal's UI with React and Tailwind, improving mobile usability and increasing mobile user engagement by 30%.
- Created a robust backend system for the company Insurance Portal, managing over 20 types of insurance claims for bank staff across 12+ countries.
- Added a User Management feature to the Insurance Portal, enabling admin users to set access permissions for specific users, improving user access control efficiency by 20%.
- Hands-on experience using Docker to containerize applications for test and production environments, streamline development, and ensure consistency across environments. I'm skilled in using Docker Compose for multi-container applications, integrating Docker into CI/CD pipelines, optimizing Docker images for performance, and deploying microservices to improve scalability and service management.

IT Specialist

Oct '22 — May '23

Lagos Business School

Lagos

Worked in the IT department of Lagos Business School, assisting with the monitoring of online sessions and supporting video and audio equipment, while performing basic server maintenance tasks

- Assisted in monitoring and managing over 100+ online sessions per month, ensuring smooth delivery of virtual classes and events.
- Performed basic server maintenance and troubleshooting, ensuring 99% uptime for the school's online platforms.

Web administrator

Jul '22 — Present

Shelter Solutions and Engineering Limited

Lagos

I oversee online marketplace and effect changes to website architecture, information and communication

- Manage and update website content, ensuring up-to-date product listings, promotions, and customer information.
